Exercise - Basic Formatting

H.S.Rai J.Singh and S.S.Sehra

12th March, 2016

Tasks to be performed

1. Add paragraphs in the text by using \newline and \par command.

2. Use different alignments in the paragraphs.

3. Add no indented and indented paragraphs.

Demonstration

Example 1: The following paragraph (given in quotes) is an example of Center Alignment using the center environment.
"LaTeX is a document preparation system and document markup language. LaTeX uses the TeX typesetting program for formatting its output, and is itself written in the TeX macro language. LaTeX is not the name of a particular editing program, but refers to the encoding or tagging conventions that are used in LaTeX documents".

This is the text in first paragraph. This is the text in first paragraph. This is the text in first paragraph.
This is the text in second paragraph. This is the text in second paragraph. This is the text in second paragraph.

"LaTeX is a document preparation system and document markup language. LaTeX uses the TeX typesetting program for formatting its output, and is itself written in the TeX macro language. LaTeX is not the name of a particular editing program, but refers to the encoding or tagging conventions that are used in LaTeX documents".

"LaTeX is a document preparation system and document markup language. LaTeX uses the TeX typesetting program for formatting its output, and is itself written in the TeX macro language. LaTeX is not the name of a particular editing program, but refers to the encoding or tagging conventions that are used in LaTeX documents".

Example 4: Following is an example of switching back to justified text after ragged text has been switched on.

"LaTeX is a document preparation system and document markup language. LaTeX uses the TeX typesetting program for formatting its output, and is itself written in the TeX macro language. LaTeX is not the name of a particular editing program, but refers to the encoding or tagging conventions that are used in LaTeX documents".

LaTeX is a document preparation system and document markup language. LaTeX uses the TeX typesetting program for formatting its output, and is itself written in the TeX macro language. LaTeX is not the

name of a particular editing program, but refers to the encoding or tagging conventions that are used in LaTeX documents
